TIKKURILA FEELINGS PAINTS

The world is only black and white in old movies. The real world is a riot of glorious colours. And each and every one of them has a unique power. A power to affect the way we feel about life. As Pablo Picasso said: "Colours, like features, follow the changes of the emotions"

So what powers do colours hold and how can we harness them to transform our home into a space that says something unique about us?

Let's start with white. It makes spaces broad and light. And symbolises purity, cleanliness and simplicity. The colour white can calm us like no other colour can.

Yellow is the warmest colour in the spectrum. It is long summer days and fields full of sunflowers. Yellow lifts our spirits. Yellow is a colour for dining rooms and kids' rooms because it has the power to feed both the appetite and the mind.

Red is the colour to set your heart racing. It is the colour of love, passion, fire, and energy.

That's why it is used in rooms where the family is most active. When red is matched with gold the effect takes on an opulent, regal air. Red has the power to be a catalyst for creativity in children, so perhaps you will want to use it in your little prince or princesses room?

The colour blue has the power to evoke quite different emotions. The tones that reflect the deep blue sea and clear blue sky, say calmness, reflection and spirituality. Choose the regal tones preferred by the blue-blooded nobility, and the result is grandeur and wisdom. Blue can make a small room feel higher and wider. Paint a bedroom blue and it will have the calming influence you need for a peaceful night's sleep.

When something as simple as a colour can affect us so deeply is it any wonder that Tikkurila take colour so seriously? That's why the ecologically friendly Feelings paints range offers you a colour palette diverse enough to not only make your home look amazing but feel amazing too.

M1 products are interior finishing materials that emit extremely low levels of compounds into the atmosphere.

INTERIOR PAINT

Full matt finish

Available in thousands of colours
Wash resistant (> 5000 cycles)
Perfect Top coat

What is it?:

Feelings Interior Paint is a full-matt, low-odour, waterborne acrylate paint for use on interior walls and ceilings. It offers good wash-resistance.

Where should I use it?:

Can be used on plaster, concrete, building blocks and boards, MDF, wallpaper, etc. Feelings Interior Paint can be used for repainting interior surfaces previously coated with waterborne or alkyd paints and is recommended as base coat for Feelings Effect Paint.

Coverage and when will it be dry?:

It covers approx 10-12 m²/l per coat. On porous and rough surfaces the spreading rate will be lower. Touch dry in only half an hour and re-coatable after 1 to 2 hours.

What colours can I get it in?:

Tikkurila Symphony 2436 Colour Card and Interior Colour Card.

EFFECT FINISH

Full-matt translucent effect paint

Long open-time
Tintable (CAP base)

What is it?:

Feelings Effect Finish is a full-matt, low odour acrylate-based waterborne translucent effect paint for use in dry interior rooms and on surfaces which have been previously painted with Feelings Interior Paint. When a more translucent end result is required Feelings Effect Finish can be thinned by up to 20% with water.

Where should I use it?:

For use in interior rooms on surfaces which have been previously painted with Feelings Interior Paint. Interior walls and ceilings in residential, commercial and storage buildings.

Coverage and when will it be dry?:

13-18 m²/l per coat. On rough surfaces the spreading rate will be lower. Normally touch dry after approximately 3 hours. Final hardness will be achieved in 14 days.

What colours can I get it in?:

Tikkurila Symphony 2436 Colour Card

NOTE! The final colour of the Feelings Effect Finish will depend upon the colour of the Feelings Interior Paint used as the basecoat. The final colour can, in some cases, look darker than the colour sample.

CEILING PAINT

Full matt finish

Good hiding power
Fast drying
Leaves smooth roller trace

What is it?:

Feelings Ceiling Paint is a full-matt, low-odour, waterborne acrylate paint for use on interior walls and ceilings. It offers excellent hiding power.

Where should I use it?:

Can be used on plaster, concrete, brick, chipboard, wallpaper, and wood-fibre boards. Feelings Ceiling Paint can be used for repainting surfaces previously coated with waterborne or alkyd paints.

Coverage and when will it be dry?:

It covers approx 7-10 m²/l per coat. On porous and rough surfaces the spreading rate will be lower. Touch dry in half an hour and re-coatable after 1 to 2 hours.

What colours can I get it in?:

Tikkurila Symphony 2436 Colour Card and Interior Colour Card. Also available in white.

UNIVERSAL PRIMER

Waterborne acrylate primer

Excellent adhesion to many surfaces
High quality

What is it?:

Feelings Universal Primer is a matt, low-odour, waterborne acrylate primer for use on interior walls and ceilings.

Where should I use it?:

Can be used on plaster, concrete, building blocks and boards, MDF, etc. Feelings Universal Primer offers a first-class foundation for subsequent coats of Feelings Extra Durable paint, Feelings Interior Paint and Feelings Ceiling Paint.

Coverage and when will it be dry?:

It covers approx 7-10 m²/l per coat. Touch dry in half an hour and re-coatable after 1 to 2 hours.

What colours can I get it in?:

Pastel and mid-tone shades in the Tikkurila Symphony 2436 Colour Card. Also available in white.
