Fontecryl SC 50

A FAST-DRYING WATER-BORNE ACRYLIC
PAINT WITH ANTI-CORROSIVE PIGMENTS

One-coat corrosion protection

Fontecryl SC 50 IS
A WATER-BORNE, ONE-
COMPONENT, FAST-
DRYING PAINT WITH
ACTIVE ANTI-CORROSIVE
PIGMENTS

Speed up the painting process

Fontecryl SC 50 is a one-component, water-borne, alkyd-modified acrylic paint for the protection of internal and external steel surfaces, including frameworks, machinery and equipment. It contains active anti-corrosive pigments for excellent long-term protection and can be used as either a single-coat paint or a topcoat. The product is MED (Marine Equipment Directive) certified, making it suitable for painting interior surfaces onboard ships.

Fontecryl SC 50 is fast drying and easy to apply with high film-building properties and excellent sagging resistance, forming a thick paint film with one application. It can be tinted to thousands of colours and is suitable for product painting in the metal industry and painting stations. Drying times can be shortened using higher temperatures.

To help compare the whole-life sustainability of construction products and materials, Fontecryl SC 50 comes with an Environmental Product Declaration (EPD) – a transparent and well-established way to communicate comparable and verified environmental and life-cycle performance information. For application instructions please refer to the product data sheet.

BENEFITS

- ☒ FORMS A THICK FILM WITH ONE APPLICATION
- ☒ OFFERS EXCELLENT CORROSION PROTECTION IN A SINGLE COAT
- ☒ CAN BE TINTED TO THOUSANDS OF COLOURS
